Easee Pedestal

Easee Pedestal: £ TBC (priced on quantities)

SKU: EPM-11R

This product is designed to allow two Easee chargers to be mounted back-to-back, featuring an access door for installing a power rail and any other electronic equipment.

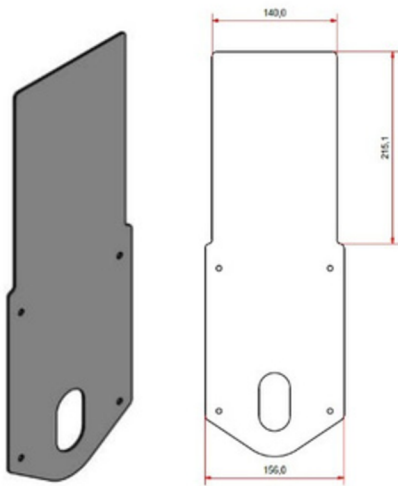

Its unique sloping design makes it ideal for on-street charging, as it prevents people from standing or resting drinks on top.

The body is constructed from stainless steel and fits securely onto our ground anchors.

You can choose between payment and non-payment variations.

These are priced on request.

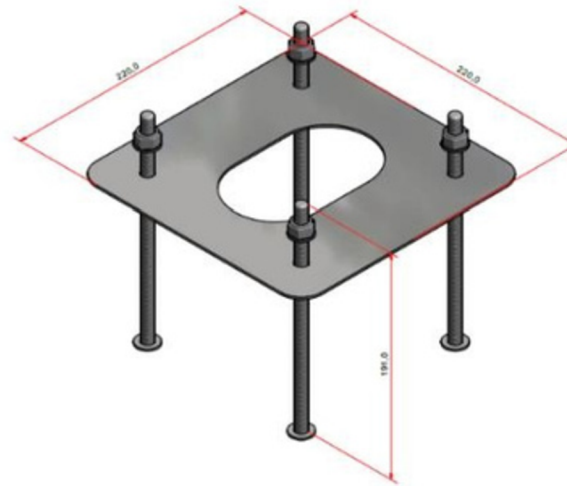

Easee Accessories

Sign Plate: £20 each **SKU: EPB-1M**

Designed to fit behind the charger on any epark Easee post to provide customer branding and instructions for use information.

Fabricated in aluminium and powder coated in architectural grade powder to finish.

Simple Ground Anchor: £35 **SKU: EPM-3S**

Designed to press into freshly poured concrete to provide fixing points for any epark Easee post.

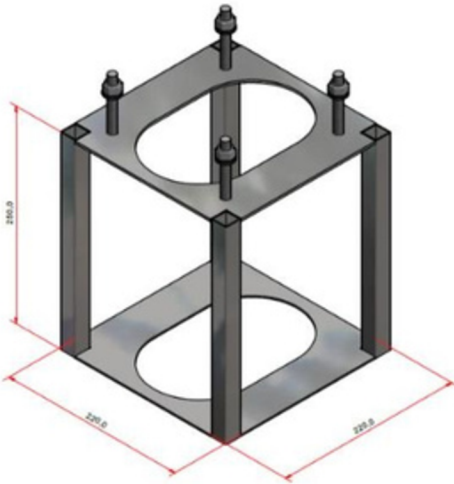

Allows for 30mm of thread to be above the surface of the concrete and for a cable duct to be positioned in the centre of the anchor.

Fabricated in stainless steel with stainless steel fixings.

Easee Accessories

Secure Ground Anchor: £57

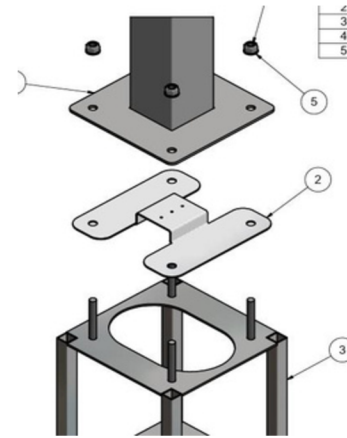

SKU: EPM-5L

A more robust anchor than the simple version and designed to be set inside the plinth before the concrete is poured.

Provides the fixing points for any epark Easee post and positioning of a cable duct in the centre of the anchor.

The parts to be encased in concrete are fabricated in mild steel with stainless steel fixings.

Easee Gland Plate: £10
for orders of 10+ units

Easee Power Rail: £35

We can produce a variety of Easee products based on requests, as illustrated above.

Barriers: Available In-Ground & On-Ground

**Hoop barrier
with signage: £115**
SKU: (EPP-T) + (EPX-1W)

Hooped Barrier: £89
SKU: (EPP-T)

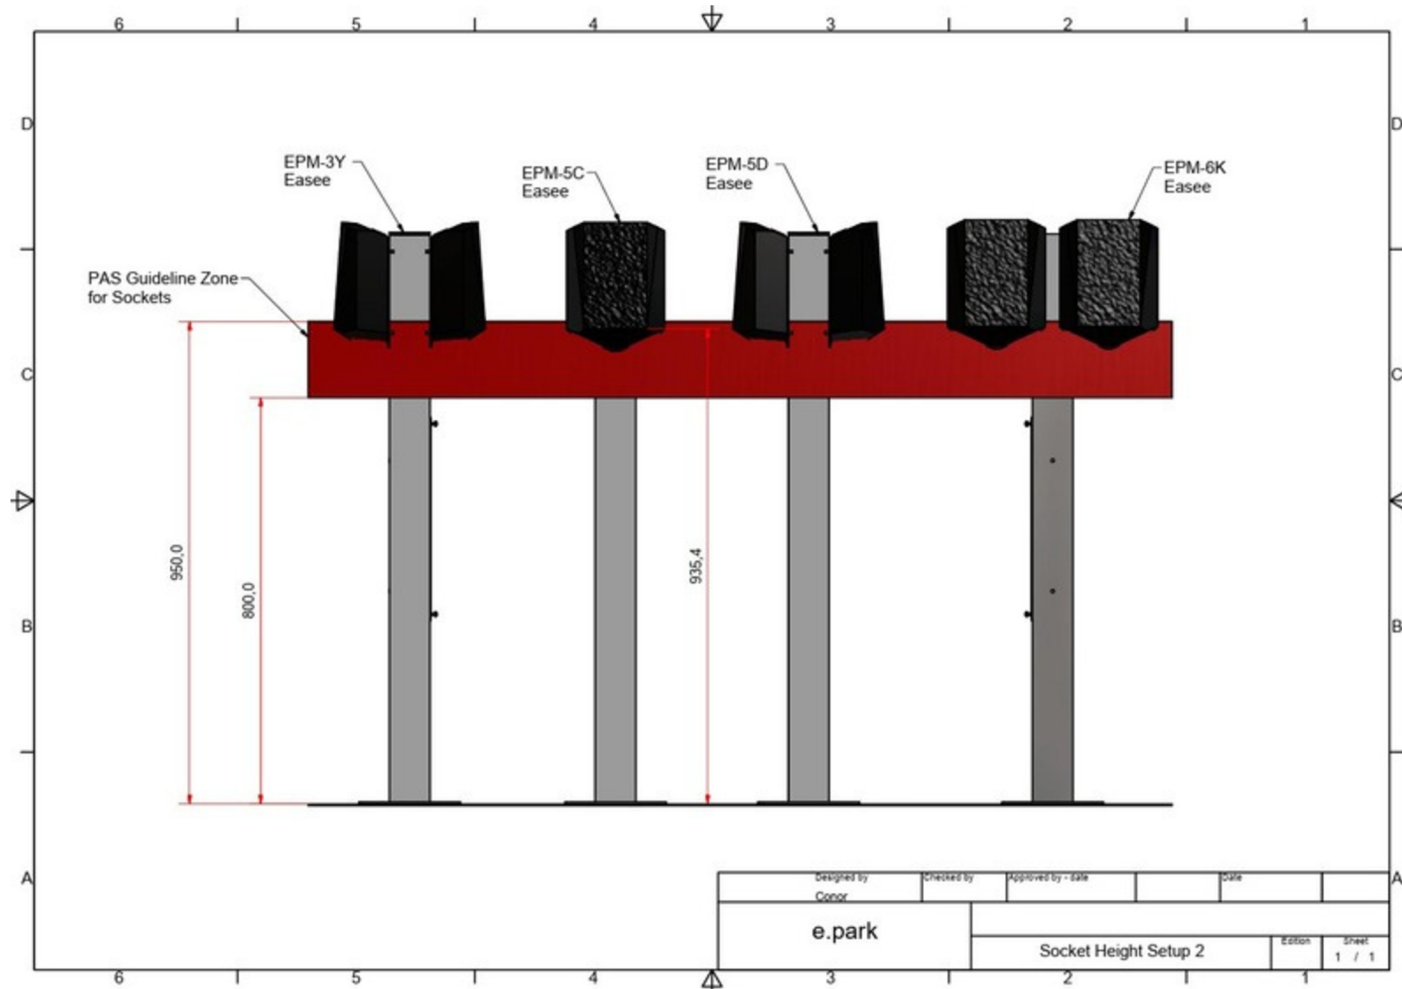

**T Barrier cable
management: £82**
SKU: (EPP-1C)

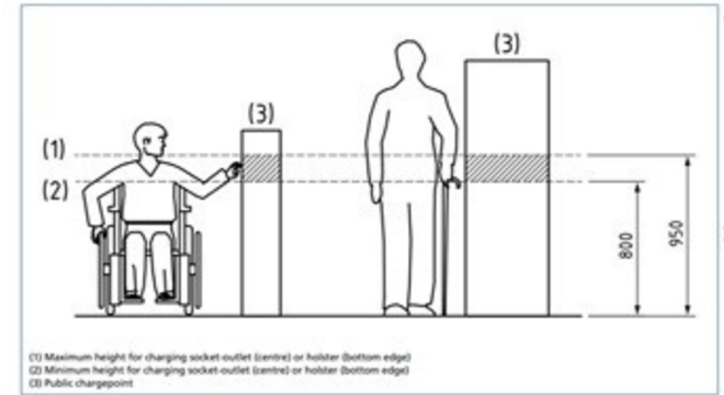

Halo Barrier: £186
SKU: (EPP-1D)

Our barriers are manufactured from stainless steel and come in black or yellow architectural powder coating.
You can choose from in- ground fixing or on-ground fixing as shown above.

Benefits of working with epark

Storage – Call Off – Delivery Service

We would be happy to operate on a call-off basis, whereby you place a bulk order and then call it off in batches to suit your sales commitments. We would manufacture the bulk order and hold the stock in our warehouse. There would be no additional charge for this, but we would require the bulk order to have been called off and paid for within 6 months from the date the order is placed. As part of the call-off service, we would be happy to ship products directly to your customers from our warehouse.

Easee Specific Posts

We already supply a range of competitively priced posts specifically for Easee chargers, all manufactured in-house in the UK.

Bespoke Design Service

If required, to overcome site difficulties, we can create bespoke designs free of charge using our in-house design team

Strong Environmental Credentials

We uphold the same environmental ethos as Easee by aligning with the UN Sustainable Development Goals: <https://eparksolutions.co.uk/sustainability/>

Access to other innovative products and on-site visits to the factory

Benefit from epark's forward-thinking design approach and innovative products such as:

- Cable-Up (cable storage/management): <https://eparksolutions.co.uk/product/cable-up/>
- Integrating payment terminals with new or existing chargers
